

Performance Improvement Committee

The Performance Improvement Committee duties include:

- Measurement of outcomes, design of new processes to identify opportunities to improve quality of care, treatment, services, patient safety, and patient satisfaction.
- Design, planning and implementation of monitoring activities that are generally noted as traditional medical staff functions (blood administration, medical record review, operative and other procedures, etc.).
- Evaluation of individuals with clinical privileges whose performance is questioned as a result of the measurement and assessment activities of the Performance Improvement Plan.
- Communication to their respective service of the findings, conclusions, recommendations and action taken to improve organization.
- Participate in implementation of changes to improve performance.
